## **Research in Social Forestry at Auburn University**

Starting in 1992, anthropologists, rural sociologists, economists, and political scientists at Auburn have been actively involved in examination of social issues and related to forestry in Alabama, the South, and beyond. To these efforts must be included those of our colleagues in forestry economics, whose program has a far longer history. Only a few works out of forestry economics are included here, where colleagues from that field have worked with other social scientists.

Research on social aspects of forestry at Auburn can be dated from the hiring of John Bliss by the School of Forestry. John is now at Oregon State University. A team of researchers involving Bliss, Conner Bailey (Rural Sociology), Larry Teeter (Forest Economics), and Glenn Howze (Rural Sociology) won a series of grants, attracted good students, and began the systematic examination of the forest products industry of Alabama and the South.

Ben Cashore, a political scientist now at Yale University, added a strong international dimension to the program during his all-too-brief stay at Auburn. When Bliss left, anthropologist Josh McDaniel was hired by the School of Forestry & Wildlife Sciences. During the three years he was here he encouraged Kelly Alley, an anthropologist in Liberal Arts, to become involved in forestry research. When Josh left, Wayde Morse was hired as our most recent social forester.

John Schelhas, an anthropologist with the USDA Forest Service has an adjunct appointment in Forestry at Auburn and has been instrumental in building a consortium of social scientists in Alabama working on forestry issues. This consortium includes colleagues at Alabama A&M University and Tuskegee University. John moved to the USDA Forest Service unit based in Athens, Georgia in mid-2010.

Social scientists working on forestry at Auburn have found colleagues receptive to collaboration. Mark Dubois, a forester from the School of Forestry, became engaged in our efforts, particularly as they related to working with limited resource forestland owners. Mark has now retired but is ably replaced by Becky Barlow.

Those working on social forestry at Auburn have been productive, as summarized below and documented in more detail in the pages which follow:

### **Summary**

Competitive Research Grants:	97 totaling \$4,099,497
Books:	7
Refereed journal articles published:	104
Book chapters published:	23
AAES & ACES publications, tech reports:	37
Doctoral Dissertations completed:	11
Masters theses completed:	28
Proceedings:	23
Other publications:	27
Invited lectures presented:	12
Papers presented at professional meetings:	153
